DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 23-24, 26-27, 45-51, and 54 drawn to a method for preventing access to a scrambled digital program, classified in class 713, subclass 193.
 - II. Claims 6-15, 28-33, and 36-37, drawn to a method for controlling the recording and reproduction of digital content, classified in class 713, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as preventing all unauthorized accesses to the digital program. In the instant case, invention II has separate utility such as controlling the recording and reproduction of digital content by descrambling the content and rescrumbling the content into a different format. See MPEP § 806.05(d). Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. A telephone call was made to Attorney William Schaal on 07 April 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Courtney D. Fields whose telephone number is 571-272-3871. The examiner can normally be reached on Mon - Thurs. 6:00 - 4:00 pm; off every Friday.
